

Restful Sleep

KenkoDream® Quilt

A quilt specifically designed for a relaxing, healthier and ultimately refreshing sleep created by Nikken, the Sleep Research company, specialising in quality sleep for 45 years.

When you sleep really deeply, your brain starts to recharge. Your learning and memory are enhanced. And when you spend enough time in the deepest stages of sleep, your muscular coordination and immune systems

also benefit. There are a number of reasons why you experience a better, more beneficial sleep when you sleep under a KenkoDream Quilt every night.

Naturally, it has a breathable cotton cover, but ceramic reflective fibres also absorb excess heat, reflecting it back as a gentle warmth whenever it's required. You'll neither be too warm nor too cold, as your body's temperature will be perfectly balanced.

A magnetic layer enhances the Earth's natural energy field, helping you to overcome stress, discomfort and low energy levels. Once you introduce the KenkoDream Quilt into your life you'll not only notice how quickly you fall asleep, but also how you wake up feeling refreshed, reinvigorated, and looking forward to a new day!

- **Far-Infrared Technology**
Provides gentle, breathable warmth, regulated by ambient and body temperature.
- **Magnetic Technology**
Surrounds you in a cocoon of magnetism.
- **Breathable cotton outer cover**
Outer cover of breathable, natural fibres
- **Chitocotton**
Contains chitosan, to help fibres retain a clean and fresh smell.
- **Ionic Comfort Technology**
Releases negative ions, like those found in soothing, relaxing forest air.
- Made from ecologically sound and non-allergenic **Natural Materials**
- **Machine washable**

A perfect balance of comfort for all climates

The KenkoDream Quilt is designed to help you get the relaxing, refreshing sleep you need.

Revolutionary technology and the finest materials allow better rest.

The quilt includes a number of key features to promote better sleep.

Far-infrared Technology

Absorbing heat energy from the environment – body heat for instance – Far-infrared technology radiates it back as gentle, calming warmth to help soothe the body throughout the night.

This helps to ease tension, helping you to sleep deeply and if woken in the night, get back to sleep.

The fibres also release any excess heat, helping you to maintain a constant temperature that's not too hot or too cold.

Negative Ion Technology

The KenkoDream Quilt increases the sensation of wellbeing by releasing negative ions. Walking through a forest or beside a waterfall is relaxing because the air in these places contains high amounts of negative ions (particles released by oxygen atoms).

Negative-ion products that create this effect are widely used in Japan. Nikken applied this idea to the Kenko Dream Quilt, adding Ionic Comfort Technology.

Magnetic Field Technology

The magnetic array throughout the quilt creates a subtle field of magnetic energy for relaxation and relief of discomfort.

As well as improving the quality of sleep, it means that all sorts of aches and complaints can be eased over time as the body is cocooned in the gentle magnetic field of the earth, as nature intended.

Transform your health in your sleep

The KenkoDream Quilt is much more than a top-of-the-line quilt. Three technologies that harness the benefits of nature are all woven into the quilt.

Magnetics, Far-Infrared and Negative Ions combine to cocoon you in the energy of the earth, the sun and the air to bring all the subtle benefits of nature to help you sleep deeply and restore energy and wellbeing every night.
