

KenkoDream® Quilt

A perfectly balanced quilt for all climates

- Exceptional Far-Infrared temperature regulation
- Increases the sensation of wellbeing by releasing negative ions
- Outer and inner covers of breathable, natural fibres
- Made from ecologically sound and non-allergenic natural materials
- Machine washable

Maintaining a constant temperature

The KenkoDream® Quilt incorporates Far-Infrared Technology - made of ceramic coated, reflective fibres - in its natural, anti-bacterial, and breathable cotton cover. Absorbing heat energy from the environment - body heat for instance - Far-Infrared Technology radiates it back at as gentle, calming warmth to help soothe the body throughout the night. This helps to ease tension, meaning that your sleep is more refreshing. The fibres also release any excess heat, helping you to maintain a constant temperature that's not too hot or too cold.

A natural environment

With built-in negative ion technology, the KenkoDream® Quilt creates an atmosphere of negative ions. Negative ions have been associated with the calm relaxation of natural environments such as forests or by the sea, and they provide you with the sensation of sleeping in nature. A magnetic array in the quilt further complements the magnetic field of the Naturest® Kenkopad®, so you have a full energy field enveloping your body throughout your sleep.

How to use

Place KenkoDream® Quilt on the bed with the blue corner label facing up.

Care Instructions

Machine wash at 40 degrees. Tumble dry warm.

Technology	Field Gradient Technology, Negative Ion Technology, Far Infrared Technology
Magnet strength	800 Gauss
Materials	Ceramic polyester filling
Inner lining	Cotton with absorbed chitosan, a natural antibacterial agent: 100%
Outer Cover	Cotton: 100%, using dobby-weave for durability and to keep fill evenly distributed.
