

Kenko PowerSleep® Mask

Total relaxation for a great night's sleep

- Shaped-to-fit soft, breathable fabric makes it comfortable to wear for hours
- Small, compact, lightweight and portable, it comes with its own travel pouch
- DynaFlux® Magnetic Technology increases your natural energy field
- Far-Infrared Technology for gentle warming and temperature regulation
- Negative Ion Technology for more calming, natural sleep

Advanced energy technology

The Kenko PowerSleep® Mask applies Nikken's advanced energy technologies to the head and eyes in a convenient way, as we often hold tension around the eyes, which can lead to the appearance of premature ageing. Combining DynaFlux® Technology to extend magnetic energy around your head, Far-Infrared, and Negative Ion Technologies, the Kenko Powersleep® Mask helps to calm your mind for deeper relaxation.

Reducing sleep disruption

There are a variety of reasons we can have trouble sleeping - artificial light, working late, sleeping away from home. Perhaps your partner works late at night and you can't sleep due to the light from their laptop, or the long summer nights mean you can't fall asleep until it's dark outside. The Kenko PowerSleep® Mask helps to reduce light as a source of disruption. Whether you're on a plane, in a hotel room, on a train, or the sunrise wakes you up through the curtains in the morning, the Kenko PowerSleep® mask can be your sleep companion.

How to use

Wear mask directly over eyes. Use elastic straps to secure on head.

Care instructions

Hand wash in cold water with a mild detergent. Air dry at room temperature indoors. Avoid ironing or twisting.

Technology	DynaFlux® Magnetic Technology, Negative Ion Technology, Far-Infrared Technology
Dimensions	H 10cm x L 20.5cm. Fully adjustable – one size fits all.
Magnet strength	800 – 1000 Gauss per magnet
Materials	Microfibre, ceramic-reflective and tourmaline fibres, ferrite, elastic
Outer fabric	100% Polyester (coated with Polyurethane)
Inner Fabric and filling:	100% Polyester (with Tourmaline and ceramic fibers mixed in). Nickel free coating, 20mm (width) elastic band.
